

# System TECHNO for damp environments

Techno security system for wet rooms is made from  $\varnothing 4$ mm wire mesh panels and section 40x40 posts.

The mesh has a surface treatment that ensures excellent resistance to corrosion and therefore ideal for wet and acid environments. The mesh itself **can be painted if required**.

The uprights and door panels are electrolytically galvanised and **can be painted if required**.

The system is mainly used by people who have to protect dangerous areas in damp environments and must guarantee high impact resistance combined with high flexibility.

Panels are available in wire  $\varnothing 4$  H=2000 and H=1400  
Panel base available: B=708, B=1028, B=1508 for H=2000  
Panel base available: B=1508 for H=1400.

Colors on request for panels and posts
