

# TECHNO-INOX *System*

The Techno Inox system was created to offer a solution in steel INOX at low cost and simple to install.

This product was created as freestanding panel, with a network designed to improve the vision of segregated machinery.

## ADVANTAGES:

### COST

The cost is contained because the panel is realized with a freestanding network (without border frame).

### VISIBILITY

The innovative network 32x67 wire Ø3 panel, improves visibility of the machinery within the segregated area.

### MODIFICATION IN OPERA

The system has the great advantage of being modified in opera through the use of few tools.

ECONOMIC

VISIBILITY

MODIFIABLE

The system can be assembly with
